CUSTOM FLIGHT CASES

BW-CASE-A / BW-CASE-B

Custom made flight cases designed to securely hold 4, 8, 12 or 16 BroadWeigh shackles and other products

"The ease of use of the BroadWeigh system, the speed at which it can be implemented and cost/value means it is both the best and the safest option for us. I would gladly recommend this system for any venue that is concerned with rigging overloads or incoming tours damaging the existing roof structures."

Derek Noble, Lead Lighting Technician at the Casino Rama Entertainment Centre, Ontario, Canada

FEATURES

- Heavy duty and lockable
- Flexible high density foam inserts for BroadWeigh product range
- Shock absorbing
- BW-CASE-A:
730 mm x 400 mm x 320 mm
- BW-CASE-B:
400 mm x 400 mm x 270 mm

These immensely strong, custom made flight cases are designed for the storage and transportation of up to 8 or 16 shackles and other accessories.

The cases are available with a selection of interchangeable, high density impact foam inserts customised for the BroadWeigh product range. The lid insert (pre-cut for accessories) comes as standard. Other features include:

- Immensely strong exoskeletal design, inspired by nature's main battle tank, the stag beetle
- Six times stronger than a standard flight case
- Flexible alternative to existing moulded transit and flight cases
- Rubber shock absorbing corners, ABS plastic coated aluminium frame together with stainless steel
- CNC foam inserts
- "I" brace corners
- Heavy duty handles for ease of transportation
- Tested to military standards
- Unique construction allows for simple refurbishment
- Designed and produced in the UK
